

Harris Weeks

Senior Engineer at Intuit using Node.js, yarn, and Express

340 Fremont St, Apt. 1803
San Francisco, CA 94105
(404) 931 - 7724
root@hweeks.com

EXPERIENCE

Intuit, Mountain View — Senior Software Engineer

Sept 2016 - Current

Designed and built the express server and CI/CD pipelines that serve all QuickBooks online web traffic, currently handling millions of requests a month

Created build systems for local development and production releases, adding a robust CLI and Node API to allow for flexible use by developers

Built out a new AEM framework focused on performance, achieved by building dependency free JS and my own light web loader

Apple, Sunnyvale — Web Application Developer (Contract)

April 2015 - September 2016

Built and maintained internal asset tracking software that all retail locations used daily.

Worked in CoffeeScript 1, Backbone.js, selenium in Ruby, and interacted with backend built with Erlang using RabbitMQ.

Designed and built various dashboards in D3 for asset health tracking, errant device status, and inventory sanity.

WebMD, Atlanta — Associate Web Developer

October 2014 - March 2015

Maintained the symptom checker tool, a Backbone.js application.

Pushed new templates for marketing pages and articles via an XSLT transforming CMS used internally.

Worked on the WordPress powered blogging platform, adding shortcode tools and other needed templates.

Helped to teach and implement Github company wide.
